Education

University Of Ottawa Ottawa, ON

Bachelor of Applied Science, Software Engineering COOP Program *Sept 2024 – Expected 2029*

- **CGPA: 9.40 / 10.0 (3.95 / 4.0)**
- **Relevant Coursework:** Data Structures & Algorithms, Software Engineering, Computer Architecture, Digital Systems, Discrete Mathematics, Web Development
- **Dean's Honour List (2024–2026)**

Experience

Platform Engineer Co-op September 2026 – Present

Jatom Systems Inc (JSI) *Ottawa, ON*

- Automated **multi-tenant** provisioning for an **Internal Developer Platform (IDP)** on **AWS EKS** with **Crossplane**, deploying namespaces, PostgreSQL, S3, and Keycloak identities from a single resource to enable self-service onboarding.
- Built Time-To-Live (TTL) expiration and self-service renewal for tenant environments, reclaiming idle resources and reducing cloud waste by **50%**.
- Automated **Kubernetes** deployments using **FluxCD** and **GitOps**, enabling ordered cluster updates from Git.
- Developed a **Go** CLI enabling self-service access to IDP resources while abstracting Kubernetes complexity.

Software Developer Co-op January 2026 – April 2026

Jatom Systems Inc (JSI) *Ottawa, ON*

- Built an **AI Enablement hub** for **GitHub Copilot**, standardizing PRD-to-production repositories with integrated agents, skills, tools, and hooks, contributing to **70%** adoption of AI-assisted development.
- Developed an **Azure DevOps notification bot** in **C#** that tracks work items based on user-defined subscription criteria and sends real-time alerts when matching items are created or updated.

Software Developer & Data Analyst Co-op May 2025 – September 2025

Black Ridge - Gestion Zagora *Montreal, QC*

- Designed and maintained **Python-based ETL pipelines** to extract ERP data via APIs, unifying, cleaning, and transforming datasets across platforms for accurate reporting.
- Built **35+ automation solutions** for discrepancy detection, contract management, and data validation, **saving 20 hours/week** in manual effort and generating **$30K in annual savings**.
- Delivered an interactive property analytics map (**Folium, Docker, GCP**) with secure hashed-password access, cutting data lookup time from **10 min to** < 1 **min.**
- Led development of responsive property websites (**React, Vite**) with booking form integrations and leasing APIs, improving leads by **35%**.

Projects

NextHomeAI | ***Python, React, PostgreSQL, Playwright, GitHub*** January 2026 – Present

- Built a **full-stack** AI real estate app using **React** and **Python** with a chatbot powered by local LLMs (**Ollama/Llama 3.1**) for natural language property search.
- Engineered an **NLP pipeline** converting unstructured queries into structured database filters with JSON validation and error recovery for real estate search.
- Built an **ETL pipeline** to ingest, clean, and standardize real estate listing data, storing it in **PostgreSQL**.
- Orchestrated backend AI flow by classifying user intent and routing requests to tools for response generation.

Technical Skills

Languages: Python, Go, C#, Java, TypeScript, JavaScript, C++, SQL
Frameworks & Libraries: React, Vite, Flask, Playwright, Pandas, NumPy
Developer Tools: AWS (EKS, S3), Kubernetes, Docker, Git, GitHub (Actions, Copilot), Azure DevOps, Crossplane, FluxCD, OpenTofu, Linux, PostgreSQL, GCP
